

Riccardo Rivoli Design is both an Italian industrial designer and manufacturer of contemporary furniture for public spaces, offices, hospitality and domestic market. His headquarter is based in San Giovanni al Natisone (North-East of Italy), a place well renowned since the beginning of the 19th century for the production of high quality chairs and tables.

Riccardo Rivoli Design prides itself on its unique fabrication processes, in which every design is carefully articulated with both form and function in mind. Every detail is studied for its durability and elemental appearance. Therefore the collection is the result of a careful and accurate research that aims to create industrial design products with original shapes made of steel, wood as well as upholstered ones. Our chief distinctive trait is a stylish minimalist design, blending form and functionality; refined products durable and comfortable, precious in details but exerting the least possible impact to the environment.

Riccardo Rivoli Design offers a wide range of seating and tables exclusively manufactured in Italy through a design process which combines tradition of genuine Italian workmanship and innovation.
